Letter from the CEO

At George Weston Limited, we strive to build generational value with an actively managed portfolio of market-leading businesses.

As a leading Canadian publicly traded company and a family-led firm with roots going back four generations to 1882, we know the important impact we have on the environment, the communities in which we operate and on our employees.

Our responsibility as a business extends beyond our shareholders to a diverse group of stakeholders. As the controlling shareholder and unitholder of Loblaw and Choice Properties, respectively, we recently adopted a new set of ESG Principles to guide the approach to ESG at GWL and our portfolio companies. Our new Principles were developed in consultation with our Board of Directors, our portfolio companies and through feedback we received from stakeholders. They reflect how we think about our business now and shape our strategy going forward. In consultation with GWL, Loblaw and Choice Properties continue to meaningfully advance their ESG programs, including adopting GWL’s ESG Principles as part of their frameworks and embedding ESG into their strategic plans.

We also recognize the importance of a strong corporate culture and the value of an engaged workforce. We believe in and abide by our core values of Care, Ownership, Respect and Excellence, underscored by a strong sense of ethics, compliance and social responsibility. These are not simply words we use – they are how we operate.

We believe a thoughtful and transparent approach to ESG is fundamental to the success of our businesses and we remain committed to leading where it matters while having a positive impact on the stakeholders we serve. We encourage you to learn more about our new ESG Principles and the important ESG initiatives that GWL, Loblaw and Choice Properties are pursuing to drive growth, prosperity, and sustainability.

ESG Principles

GWL’s ESG Principles, adopted by the Board in 2022, are focused on establishing a group-wide approach to ESG while ensuring that responsibility for developing and implementing “fit for purpose” ESG programs resides with the boards and management of Loblaw and Choice Properties.

Loblaw and Choice Properties have adopted the ESG Principles as part of their ESG frameworks and incorporated them into the development of their robust and industry leading programs. Each company seeks to establish ambitious ESG targets and develop impactful programs to achieve its goals. These targets and programs, and the results achieved by Loblaw and Choice Properties, are described in separate ESG reports published annually.

ENVIRONMENT

- Our businesses have a responsibility to positively impact the communities in which they operate and to link sustainability with growth and prosperity
- Our businesses must commit to science-based, measurable targets to achieve net zero carbon emissions, with near, medium and long-term objectives that hold management and boards accountable

- As a leading Canadian public company and the largest private sector employer in the country, we have a responsibility to ensure that our businesses address social equity
- Each of our businesses must commit to specific and measurable objectives to ensure that its leadership team and workforce are diverse and that its culture is one of equity and inclusion
- Our businesses must operate in a manner that is sensitive to the communities in which they operate to make them healthier and more equitable and inclusive

GOVERNANCE

- Our businesses must adhere to the highest standards of corporate governance, focusing on appropriate and transparent decision-making processes that take into consideration all relevant stakeholders
- Our businesses must develop, manage and supervise their own ESG programs while also respecting these principles

Environment

ENVIRONMENT

- Our businesses have a responsibility to positively impact the communities in which they operate and to link sustainability with growth and prosperity
- Our businesses must commit to science-based, measurable targets to achieve net zero carbon emissions, with near, medium and long-term objectives that hold management and boards accountable

Ensuring that businesses in the Weston Group are good stewards of the environment aligns with GWL’s mission of creating generational value.

Failure to take meaningful action to protect the environment, including implementing initiatives to combat climate change, could result in significant long-term financial costs. Taking meaningful steps to protect the environment is not only the right thing to do for the country but is also critical to the long-term sustainable development of the Weston Group’s businesses.

With just over 100 employees and limited physical footprint through its corporate office, GWL’s corporate centre ESG program does not include stand-alone environmental targets but, Loblaw and Choice Properties have established meaningful environmental targets that are informed by the GWL ESG Principles.

Loblaw has plans to reduce its greenhouse gas emissions and eliminate waste from its business through actions, including reducing emissions across its operations by 50% by 2030, operating a zero-emission fleet by 2030, reducing plastic waste, including making all control brand and in-store product packaging recyclable or reusable by 2025, and sending zero food to landfill by 2030.

Choice Properties has committed to setting ambitious science-based greenhouse gas emission reduction targets based upon the Science Based Targets initiative (SBTi) Net-Zero Standard.

Loblaw has many programs in its corporate grocery stores that have both reduced carbon intensity and environmental impacts, including:

- Electronic shelf labels in hundreds of stores, helping reduce paper/plastic-based shelf labels
- Centralized building energy management systems that provide real-time information to ensure optimized performance
- Reduced reliance on high global warming potential (GWP) refrigerants
- Phenol-free receipt paper for use at front-end checkouts
- Electric standby refrigeration units on many trailers, reducing the use of fossil fuels

Social Equity

- Our businesses must operate in a manner that is sensitive to the communities in which they operate to make them healthier and more equitable and inclusive

The Weston Group must do its part to establish a more equitable, diverse and inclusive society.

The Weston Group seeks to respect and protect human rights of all people who support and intersect with its businesses, and does not tolerate abuse, discrimination or harassment in any form.

To bring the Social Equity principle to life, each company within the Weston Group has established social equity priorities that reflect its business and role within the communities in which it operates. The Company’s high-performance culture requires that all of us adhere to those standards both individually and collectively.

Materiality

In 2022 Loblaw conducted a materiality assessment in line with the Global Reporting Initiative (GRI) Standards, to determine which issues have the greatest impact on its business and importance to its stakeholders. Loblaw engaged a third-party consultant to deploy a survey to over 600 internal and external stakeholders, including employees, suppliers, government, academia, NGOs and investors, measuring the importance, relevance, impact and perception of selected ESG issues. It also considered elements such as familiarity with Loblaw’s existing sustainability practices and the evolution of sustainability issues over time. Recognizing the increasing impact that investors have on sustainability agendas, Loblaw also conducted targeted interviews with this stakeholder group to understand the financial sector’s most material topics of concern.

ESG Governance

The Loblaw board oversees the company’s enterprise risk management program, including its design and structure, as well as the assessment of its effectiveness. Risks related to governance, workplace health and safety, the environment and ethical business conduct are monitored and reported on by management to the board. The Loblaw board also oversees and monitors the company’s approach, policies and practices related to ESG matters.

In 2021, Loblaw established an ESG steering committee, comprised of senior leaders. It is responsible for setting priorities, championing progress and overseeing a control environment that ensures the accuracy and completeness of ESG reporting. Loblaw management board and various executive leaders are responsible for setting priorities and implementing ESG initiatives.

Golden Design Rules to Reduce Plastic Waste

The Golden Design Rules were launched globally in 2021, setting standards for packaging design to eliminate problematic elements. Late last year, Loblaw communicated with its hundreds of control-brand vendors, outlining Loblaw’s new standards and highlighting the global rules. By year end, 732 of Loblaw’s vendors registered for Packaging Association of Canada training. These efforts will continue in 2022.

Zero Food to Landfill

In 2018, Loblaw set an initial commitment to reduce food waste to landfill across its corporate operations by 50% by 2025 from a 2016 baseline – a goal surpassed in 2020, five years ahead of plan.

Loblaw set a new ambition in 2021. First, Loblaw is extending its commitments to the full enterprise, including franchise store operations and its supply chain. Second, each of Loblaw’s stores, corporate or independent, will achieve food waste reductions by year-end 2023; and third, Loblaw set a new goal: zero food to landfill by 2030.

ESG at Choice

Choice Properties REIT is a large and diversified owner, manager and developer of a high-quality real estate portfolio comprising over 700 properties.

Choice Properties aspires to develop healthy, resilient communities through its dedication to social, economic and environmental sustainability.

Choice Properties' commitment to ESG practices is aligned with its purpose of creating enduring value through the ownership, operation and development of high-quality commercial and residential properties. Recognizing that its responsibility extends beyond the space it owns, Choice Properties aspires to develop healthy, resilient communities through its dedication to social, economic and environmental sustainability.

Choice Properties focuses its ESG program around two pillars where it can best create enduring value and which align with its stakeholders' interests: Fighting Climate Change and Addressing Social Equity.

ChoiceProperties

Fighting Climate Change

Choice Properties has committed to doing its part to preserve the planet’s resources for current and future generations. It uses short-term targets related to its environmental activities to keep it accountable.

Choice Properties develops and carries out programming that encompasses a wide range of environmental focus areas throughout both its operating properties and its development program. The aim of these programs is to reduce carbon emissions and preserve the planet’s resources for current and future generations.

As one of Canada’s largest landlords and a long-term owner of real estate, Choice Properties has an important role to play in addressing the greenhouse gas emissions that are contributing to climate change. Its purpose of creating enduring value extends beyond the short term. It is aligned with the need to promote a more sustainable future to mitigate the effects of climate change on communities and its business.

Choice Properties achieved its 2023 greenhouse gas emissions reduction target two years early. This target called for a 10% reduction in same-asset greenhouse gas emissions within Choice’s operational control (primarily Scope 1 and 2). Improving energy efficiency in its office portfolio and converting over 75% of the exterior lighting in its retail and industrial portfolio to an LED standard were key drivers in meeting this target. Choice Properties achieved a 24% same-asset reduction (and a 47% absolute reduction when including properties that were owned partly or wholly by Choice at any point between 2018 and December 31, 2021).

Addressing Social Equity

Choice Properties is committed to conducting its business in a manner that is respectful to the communities in which it operates. It develops and implements programming that encompasses a wide range of social topics that focus on its diverse stakeholder groups. Collectively, the aim of these programs is to advance opportunities for its stakeholders to thrive while delivering on Choice Properties’ strategic objectives.

Choice Properties holds itself accountable for advancing diversity, equity and inclusion at all levels.

As part of its efforts to advance social equity, in 2021, Choice Properties launched its diversity, equity and inclusion framework, which includes programs focused on four areas: (i) Recruitment, Advancement & Conduct; (ii) Education & Culture; (iii) Community; and (iv) Suppliers.

Reporting and Disclosure

Fulfilling Choice Properties’ purpose of creating enduring value requires understanding both the financial impacts of ESG issues on its business as well as the impact of its activities on society and the environment. Choice Properties has used the concept of double materiality to assess and incorporate non-financial topics into its plans. This enables it to build programs and allocate resources to activities that are the most impactful, both financially and socially. Choice Properties has assessed financial materiality for its business using the real estate-specific Materiality Map published by the Sustainable Accounting Standards Board (SASB) Standards and the Financial Stability Board’s Task Force for Climate-Related Financial Disclosures (TCFD) Recommendations.

Quinn & Partners conducted a verification of Choice Properties’ 2021 energy, water, waste and GHG emissions statements for the reporting year from January 1, 2021 to December 31, 2021 to a reasonable level of assurance. Based on its verification activities and findings, Choice Properties’ GHG emissions statement and energy, water and waste statements are fairly stated prepared to a reasonable level of assurance in accordance with ISO 14064- 3:2019.

Choice’s Net Zero Commitment

In 2021, Choice Properties committed to setting targets through the Science Based Targets initiative’s (SBTi) Net-Zero Standard. In line with the SBTi requirements, Choice Properties’ targets will:

- Encompass its entire portfolio and development pipeline
- Apply to its entire value chain (Scopes 1, 2 and 3)
- Align with a 1.5°C future
- Be achieved with deep emission reductions before applying offsets
- Include both a 2030 and 2050 target
- Be tracked and reported in line with global standards

Choice Properties’ targets are currently with the SBTi for validation, with more details, including its net zero transition plan, to be provided in 2022 and reporting on its progress in the coming years.

ESG Program Governance

Choice Properties executes ESG programming by integrating specific initiatives embedded in the business functions, with oversight occurring within the established governance structures. A dedicated ESG team, led by the Senior Director of Sustainability, coordinates these activities and reports directly to the President & CEO.

Choice Cares

Choice Cares is our community involvement program through which Choice Properties’ colleagues raise funds and volunteer their time to support the work of local charitable organizations. The Choice Cares mission is to form a collective of empowered individuals capable of making a lasting positive impact in the communities in which they live and work.

A bottom-up approach encourages our colleagues to take ownership of the Choice Cares program. Every year, colleagues vote on a socioeconomic issue to tackle on a national level and vote on charities with which to partner on a local level. Once the charity partners are selected, colleagues volunteer to form a national committee of Choice Cares Champions, working together to lead philanthropic activities and assume responsibility for the success of their region’s campaign.

In 2021, the national fundraising campaign theme focused on supporting mental health programs in our communities and raised over \$400,000 and colleagues volunteered more than 1,200 hours (4.4 average volunteer hours per colleague).

Choice Properties Supporting Tenants and Communities Through the Pandemic

The COVID-19 pandemic continued to impact tenants and communities throughout 2021. Choice Properties continues to adapt and respond, while putting in place programs, policies, and measures to safeguard its tenants, and bring resources to its communities. Choice Properties continues to support the pandemic effort through:

- Hosting vaccine pop-up clinics at its properties, including the Golden Mile and 25 Photography Drive plazas in Toronto, bringing communities closer to public health resources
- Providing free rapid testing to its tenants on-site at the Weston Centre and to its colleagues and contractors throughout the country
- Making operational changes such as increased ventilation and filtration at its properties that supported achievement of the WELL Health-Safety Seal for Facility Operations
