

**Dr. Suzanne Budge** received her Ph.D. in Chemistry from Memorial University of Newfoundland, St. John's, Newfoundland, in 1999. She then worked as a research associate for five years at Dalhousie University, Halifax, Nova Scotia and University of St. Andrews, Scotland. In 2004, she became a faculty member in the Department of Process Engineering and Applied Science at Dalhousie University. Dr. Budge is now a full professor and teaches in the Food Science and Chemical Engineering programs. She also holds a cross-appointment with the Department of Biology. Dr. Budge maintains an active research program with funding from both Canadian and international granting agencies, and carries out extensive consulting in the area of marine lipids with academic and industrial clients through the Canadian Institute of Fisheries Technology at Dalhousie. She has published >70 peer-reviewed research papers, reflecting her research interests in the applications of fatty acids and stable carbon isotopes in elucidating food webs and trophic linkages. Dr. Budge is also an Associate Editor for Marine Chemistry.
